

VESSEL ITINERARY QUESTIONNAIRE

Your answers to the questions on this questionnaire will provide the information insurance underwriters need to make an informed decision about whether to offer insurance to you for your vessel and on what terms and at what premium that insurance will be offered. As in all matters concerning marine insurance, it is crucial that any relevant information be provided and that all information be truthful. The underwriters trust you will exercise the utmost good faith in completing this form, but also understand that plans can often change.

Reference Information

Please provide information about you and your vessel that insurance underwriters can use as a reference to consider how well suited your vessel is to the itinerary.

Vessel Itinerary

Beginning with the period when the insurance is expected to take effect or be renewed, please describe your expectations of where the vessel will be and how it will be used during at least the succeeding twelve months. Understanding that plans for over a year away are even more likely to change, please provide your best sense of your plans for a second twelve months, as this often allows targeting the placement of your insurance with an underwriter that can be of service for a longer term.
